Ashikur Rahman

Shopify & Headless Engineer

Website | LinkedIn | contact@devashik.com | +8801795007488 | Github

Frontend developer with 8+ years of experience and 100+ stores delivered across Shopify OS 2.0 and modern JavaScript. Currently working full-time in an agile team taking sprint tasks from concept to launch.
Product & Team Ownership: Partner directly with PMs and designers in daily stand-ups and sprint cycles to ship clean, user-focused features on time.
Performance & CRO: Build lightweight, high-converting stores with native customizer controls, cutting down app bloat and keeping mobile load times under 2 seconds.
Accelerated Delivery: Integrate AI-assisted workflows into daily coding for rapid scaffolding, automated testing, and faster sprint turnarounds.
Battle-Tested Reliability: Grounded by years of live troubleshooting at scale (20,000+ cases at WPMU DEV). Dependable, communicative, and comfortable working asynchronously.

WORK EXPERIENCE

Shopify Developer, EcomExperts
09/2026 – Present

- Developing high-converting Shopify stores for brands with a strong focus on performance, conversion optimization, and a seamless user experience.
- Taking ownership of assigned tasks from the Product Manager and converting them into high-quality, scalable, and user-centric digital products.
- Launching high-converting Shopify stores that maximize ROI.
- Optimizing store performance and user experience for better conversion rates.
- Participating in daily stand-ups, sprint planning, and retrospectives to ensure smooth project delivery.

Freelance Web Developer, Self Employed
04/2023 – Present | **Remote**

- Architect and build custom Shopify OS 2.0 themes from scratch using Liquid, Alpine.js, and modern JavaScript, ensuring 100% fidelity to Figma design files.
- Engineer native theme features (AJAX slide-out cart drawers, dynamic product bundles, and tiered pricing) to eliminate paid app bloat and maintain sub-2-second load times.

Technical Support Engineer, WPMU DEV
11/2018 – 02/2023 | **Remote**

- Diagnosed and resolved 20,000+ live technical cases covering server-level hosting issues, theme/plugin conflicts, and security vulnerabilities.
- Collaborated closely with core engineering teams to isolate reproducible bugs, test patches, and write technical troubleshooting documentation.

EDUCATION

Bachelor of Science, Computer Science & Engineering,
Rajshahi Science & Technology University, Bangladesh
01/2019 – 12/2022

- GPA: 3.35

PROJECTS & CASE STUDIES

Rebuild of a Legacy Theme
04/2026 – 05/2026

- Rebuilt a legacy e-commerce storefront into a bespoke Shopify OS 2.0 theme using Liquid, Alpine.js, and Tailwind CSS.
- Coded native upsells, an AJAX slide-out cart drawer, and review integration without relying on heavy third-party plugins.
- Achieved a 90+ mobile Core Web Vitals score and sub-2s initial load time.

Bespoke Shopify OS 2.0 Storefront ,
AI generated template to Shopify
04/2026 – 05/2026

- Convert an AI-generated template into a functional Shopify Theme.
- Develop the cart, cart drawer, and advanced custom features while avoiding 3rd-party app bloat.

SKILLS

- **Core E-Commerce:** Shopify 2.0 | Liquid | Schema/JSON | Shopify APIs (Storefront & Admin) | Webflow
- **Frontend Development:** JavaScript (ES6+) | Alpine.js, React | Next.js | HTML5 | CSS3/SCSS | Tailwind CSS
- **APIs & Data::** REST APIs | GraphQL | JSON dataLayers | GA4/GTM integrations.
- **Tools & Workflow:** Git | GitHub | Figma | Postman | Vercel | Linux/Bash, Shopify CLI | Antigravity, Claude, Co-Pilot
